Summary

4 YEARS OF EXPERIENCE

Software products I have worked on so far

Potential Inc. [SaaS / Web & Mobile Products] — Dental restoration lab (generated **\$138K in US and Canada sales in the first half of 2026**) · AI artwork-recognition app · Art-appraisal marketplace · TCG marketplace app · B2B Premier League ticket platform · Korea social-discovery app (Timeleft-inspired) · PM Dashboard (internal AI-augmented PM tool)

Kawaii Advanced Technology & Solution Ltd. [ERP / SaaS / Full-stack] — JTBS ERP (Apparel), DET Bridge (Japan's first DET prep SaaS), LifeArk-nihongo & Achieve Japan LMS, Findy Job & Futurenation Bangladesh–Japan job placement

Clients & Partners — Ivorymade, NTT Docomo, Persol Group, UNDP, ICT Division, JB TEX BD, Hameem Group

Proficiencies — AI-augmented delivery · End-to-end product shipping · Project budgeting & tech-stack guidance at kickoff · PM & QA dual ownership · Client & executive reporting

Experience

Project Manager

Potential Inc.

Jun 2025 – Present

Remote · South Korea-based software farm

- Ran every project end-to-end — from pre-sale kickoff with prospects through to product launch — bridging business strategy and engineering execution for cross-functional teams of engineers, designers, and QA.
- Built AI workflows in Claude Code (with n8n and Notion) that cut average client delivery from 3 months to 1 month — and shipped 6 web and mobile products end-to-end in 11 months for Japanese, Korean, US, and European clients.
- Owned planning and scope from kickoff: drove communication strategy, translated stakeholder-validated business requirements, built deliverable-oriented WBS with man-hour estimation, set resource and budget plans, and ran proactive risk assessment and mitigation before development began.
- Ran execution and delivery: daily standups tracked in Notion and our internal PM Dashboard ticket system as single source of truth, variance analysis with issue logs and timely escalations, change control with stakeholder buy-in, weekly stakeholder progress reports, hands-on QA testing and UAT cycles I run myself, plus app store submissions and release management.
- Architected Potential's end-to-end Agile/Scrum delivery system in Notion and worked as Product Owner of PM Dashboard, our in-house AI ops platform centralizing Slack, Google Meet, GitHub, and Notion.

Project Manager

Kawaii Advanced Technology & Solution Ltd.

Feb 2024 – May 2025

Dhaka, Bangladesh · Japan–Bangladesh joint venture

- Ran 3 offshore engineering teams across Bangladesh–Japan delivery, leading sprint planning in Jira, daily standups, and weekly client meetings with Japanese stakeholders.
- Owned user-story authoring and feedback cycles in Jira and Confluence, documentation across PRD/BRD/SRS, plus UAT and release management for ERP, SaaS, and full-stack engagements.

Quality Control Analyst

May 2023 – Dec 2023

[InsideMaps Dhaka](#)

Redwood City, California, US · Remote · Real-estate 3D virtual-tour platform

- Authored test cases and ran nightly regression sweeps on a real-estate 3D-tour pipeline.

Front-End Web Developer

Aug 2022 – May 2023

[Care-box Ltd.](#)

Dhaka, Bangladesh · eHealth product

- Shipped React and Next.js front-ends for an eHealth product. Built the production-code reading habit that still informs how I work as a PM today.
